IT specialist
for system integration

that's what it's all about

Fundamentals

You think every problem leads to a solution? You love troubleshooting, computers, and networks – but also interacting with people? Then you're perfect for the IT Specialist for System Integration. At JKI you're the first point of contact when something isn't working: computers, networks, servers, videoconferencing – so scientists can work and research. If you enjoy teamwork and want an exciting, communicative apprenticeship, apply!

Checklist:

- Empathy & communication
- Team player with people skills
- Willingness to learn, tech enthusiasm, solution-oriented
- A-levels, intermediate school leaving certificate, or simply show commitment and interest

Contents include

What does an IT Specialist for System Integration do? With us there are diverse tasks in the IT team of a large site: support, networks, servers, printers, videoconferencing, software troubleshooting, project planning, and user interaction. You'll work with Windows and Linux servers, so you'll learn both worlds. Typical daily tasks plus exciting projects and new technical challenges are part of it. In the end, there's the IHK exam. You choose your own project – your commitment determines the direction. After the apprenticeship, doors open in many IT fields, also outside our institute.
